

TALENTSTREAM RECRUIT

Recruitment is becoming increasingly challenging with apparently countless tools available in the marketplace. What if you need only ONE solution that brings everything together and creates a great experience for both candidates and the recruiters.

ONE SOLUTION FROM ACQUIRE-TO-HIRE

Introducing the Talentstream Recruit, a cloud-based solution to help your organization reach 'hard-to-find talent', hire them, and create your pipeline of active and passive candidates.

Talent acquisition professionals rely on CRM (Customer Relationship Management) tools, mobile recruiting, sourcing from job boards and apply people analytics to help them find the right candidates. Today's ATS (Applicant Tracking Systems) solutions have not kept up the pace and lack in one or more areas - driving several organizations towards solutions outside their ATSs.

We understand that Time is your biggest asset, and your candidate sourcing technology should add back hours to your day and not otherwise. Due to the demands of your business, you need a technology that can create the efficiency and respond quickly for you to make good, definitive decisions faster.

THE ALL-IN-ONE PRE-HIRE PLATFORM

Talentstream Recruit is a Software-as-a-Service based solution that cumulates candidate data, job postings, data and analytics into one pre-hire platform.

KEY BENEFITS:

Recruiter Efficiency: Get everything you need in one place - Post, source, manage and onboard from ONE platform.

Employer-Branded Candidate Experience: Talentstream Recruit has a built-in candidate experience to highlight your current opportunities through a smart career site seamlessly integrated to your company website and social channels.

Intuitive Data and Analytics: Access candidate data from your career site & ATS and gain insights into the business impact of your talent acquisition sources.

KEY FEATURES:

■ Optimized Career Site

Leverage our candidate-focused career site-optimized for any device to connect with job seekers.

■ Automated CRM

Engage your candidate pipeline with - job recommendations, instant apply confirmation emails, & weekly job alerts based on candidate's desired title and location.

■ Configurable ATS Workflow

Collaborate with our project managers for seamless integration into your existing ATS and streamline your recruitment process.

■ One Place. One Search

Find candidates already in your database - combine past applicants, Talentstream Engage members or career site and sourced candidates on ONE platform in ONE search.

■ Job Distribution

Enter the job details once, and post them to a number of job boards, social media channels and professional networks repetitively with Talentstream Job Distribution.

■ Access and Analyze Recruiting Data

Leverage data and analytics to evaluate your talent strategy and maximize efficiency. Access and analyse the performance of your sources on one dashboard.
